

PM on the Cloud: Reduce Project Management Costs Without Losing Control of Your Implementation

Optimized for Managing All Tracks of Work Through All Phases of the ASAP Life Cycle Reducing Administrative Effort, Time and Expense:

- Quality Gate project structure with pre-loaded WBS containing ASAP Best Practice Industry Solutions for the PMO and for each sub-team.
- Easy multi-user access on the cloud keeping all project information in a single database for fast status updating, retrieval and analysis.
- Proven project management reporting for quick communication of scope, schedule, cost and quality status and for making issues and risks visible to stakeholders at all organizational levels.
- Automatic Email notifications and escalations can be sent to assignees of decisions, risks, action items and test problems based upon defined business rules.
- Effective change request and approval processes to eliminate costly scope creep and unnecessary customizations.
- Predesigned analytical charts to help you stay ahead of emerging problems by spotting adverse trends and exceptions to plan. Also, all data are exportable to excel to do your own analysis and data mining.
- Special analytical tools and visualizations tailored to meet the needs of SAP implementation realization and testing phases. These include: test case rundown charts and test case bottleneck charts.
- Special value proposition tracking tools and visualizations using Bayesian Weight of Evidence measurements.

WEB ENABLED SaaS INTEGRATED PROJECT AND PORTFOLIO MANAGEMENT TOOL WILL GET YOU UP AND RUNNING IMMEDIATELY!

- Affordable, secure, cost effective and easy to use by all implementation stakeholders
- Accessible from anywhere over the internet
- No hardware to maintain
- Client-specific hosting and customization available as an option
- Proven since 2008. Based upon 20 years SAP Project Management consulting and training

ACTIONABLE INFORMATION AT THE RIGHT LEVEL OF DETAIL FOR ALL STAKEHOLDERS

- See the big picture as well as the details
- Easy-to-Understand Analytics and Reports
- Milestone Quality Gate reporting keeps quality in the forefront
- Project performance reporting for each track of work by deliverable maintains accountability
- Extensive Risk Management and “Voice of the Team” functionality keeps emerging risks visible
- Notifications raise project priorities and reduce administrative time and effort for the PMO, consulting managers and for team leads
- Effective scope tracking of SAP processes and customizations (WRICEFs)

SUPPORTS THE ASAP METHODOLOGY

- Can be preloaded with SAP best practices for each functional sub team
- Tailored for ERP and business transformation initiatives. Can be used by senior executives, the PMO, program managers, project managers, team leads and the performing organization
- Combines Waterfall and Agile development approaches for rapid implementation
- Ideal for project managers and team leads working remotely
- Consulting, training and support packages available
